Natural way to health

ROSANNA Traditional Chinese Medicine Centre, where practitioners use acupuncture and herbs to treat a range of medical conditions, including infertility, has been operating for more than 15 years.

"We pride ourselves on our reputation for providing quality treatments and our practitioners understand that when you visit us, you want to not only relax but be confident that you will experience a treatment that makes a difference," TCM practitioner Fiona Aspromonte said.

"As TCM practitioners, we not only focus on the symptoms but also

establishing the root cause of disease, therefore helping to prevent recurrence.

"We take the time to listen, and use this information to help guide patients in a direction of preventative care. Allow us to guide you through a journey of health and well being."

Mrs Aspromonte said TCM treatments typically combined acupuncture, herbal medicine and other modalities, such as cupping, moxibustion and Chinese massage, as well as dietary and lifestyle advice.

Chinese herbs and acupuncture are used to rectify the underlying imbalance to restore normal

functions. Another feature of Chinese medicine is that it is natural, reflecting its holistic nature.

In treating patients, all aspects of their well-being are taken into consideration. Other TCM practitioners at the centre include Gabriele Aspromonte, Catherine Russo, Jeffrey Segal and Elise Boyar. Consultations are available Monday to Saturday, with late night appointments on Wednesday and Thursday.

Rosanna Traditional Chinese Medicine Centre is at 78 Lower Plenty Rd, Rosanna.
